FOR IMMEDIATE RELEASE

INNOVATIVE COMMUNICATION TECHNOLOGIES SELECTS SWITCH MANAGEMENT FOR WHOLESALE BILLING SOLUTION
WebCDR™ to Provide ASP Billing Services for Partition Provider

OAKLAND, CA – November 20, 2002 -- Switch Management Corporation (www.switchmanagement.com), a leading OSS software provider to the telecommunications industry, has announced that Innovative Communication Technologies (ICT), a full service partition provider, has selected the award-winning WebCDR™ to handle wholesale billing for its partitioned clients.

Through its main facilities located in Midtown Manhattan, ICT operates a Nortel DMS 250, an NACT calling card platform, numerous gateways and gatekeepers. ICT supports national and international carriers and resellers seeking to gain fast, affordable access to the U.S. and international telecommunications markets.

"WebCDR provides a user-friendly, ready-made billing solution for our customers," says Joe Cini, ICT president. "This web-based service was actually presented to us by one of our customers. We were so impressed with the system's rapid implementation and extensive reporting, we decided to make WebCDR ICT's official billing partner."

Adam Nathanson, Switch Management president, adds, "With a combined ICT/WebCDR solution, a provider can be up and running in as little as 48 hours, gaining almost instant access to advanced switching and comprehensive billing. No other solution in the marketplace today offers providers this much – this fast."

For more information on WebCDR contact Switch Management sales, at (510) 452-9200, x2 or inquiries@switchmanagement.com.

About Switch Management Corporation

Switch Management Corporation supplies OSS software to international circuit-switched and VoIP carriers. Its award-winning WebCDR carrier billing ASP allows carriers to fully outsource their billing operations while realizing significant cost savings over traditional in-house billing. Switch Management also publishes Switch Watchdog, a real-time switch monitor and QoS alarm management program designed to replace 24/7 operations staff in small to mid-sized carriers. For more information, call (510) 452-9200 or visit www.switchmanagement.com.

About Innovative Communication Technologies

ICT combines network engineering and consulting services, with its carrier-class switch partitioning and network management services, to provide turnkey

telecommunications solutions for its customers. Utilizing a Nortel DMS 250 switching platform, ICT supports national and international carriers and resellers seeking to gain fast, affordable access to the U.S. and international telecommunications markets. For more information, call (954) 561-5125 or visit www.icctelecom.com.
