FOR IMMEDIATE RELEASE

**SWITCH MANAGEMENT TO PROVIDE WHOLESALE BILLING SOLUTION
FOR SIRIUS TELECOM**
WebCDR™ to Provide ASP Billing Solution for US-Based VoIP Provider

OAKLAND, CA – February 25, 2002 -- Switch Management Corporation (www.switchmanagement.com), a leading OSS software provider to the telecommunications industry, today announced that SIRIUS Telecom, an international provider of VoIP-based termination, and regional collocation provider, has selected the award-winning WebCDR™ to handle its carrier billing, and Switch Watchdog™ for real-time traffic monitoring.

“By calculating the bills for our carrier customers and foreign partners (vendors), WebCDR will help us to quickly start our company without investing millions of dollars in a billing application or support personnel,” says Steve Brough, director of business development & marketing for SIRIUS Telecom. “Additionally, Switch Management’s real-time traffic monitor, Switch Watchdog, was a needed addition to our growing VoIP network. Watchdog will be instrumental to our route performance management, enabling us to troubleshoot problems as they occur.”

SIRIUS Telecom currently owns Nortel 250/300 and a Siemens switches in Los Angeles and New York. The company also has plans for more switch purchases later this year.

“Wholesale VoIP carriers, like SIRIUS Telecom, depend on a comprehensive billing system to help them stay on top of their profitability,” says Adam Nathanson, president of Switch Management. “WebCDR is a perfect way for them to acquire that billing system with no hefty up front costs and immediate deployment. We are confident that SIRIUS, and its customers, will immediately realize the benefits of our billing and switch monitoring products.”

For more information on WebCDR contact Mark Schofield, vp of sales, at (510) 452-9200 or marks@switchmanagement.com.

About Switch Management Corporation

Switch Management Corporation supplies OSS software to international circuit-switched and VoIP carriers. Its award-winning WebCDR carrier billing ASP allows carriers to fully outsource their billing operations, and realize significant cost savings over traditional in-house billing. Switch Management also publishes Switch Watchdog, a real-time switch monitor and QoS alarm management program designed to replace 24/7 operations staff in small to mid-sized carriers. For more information, call (510) 452-9200 or visit www.switchmanagement.com.

About SIRIUS Telecom

SIRIUS Telecom provides top quality, wholesale origination and termination of voice (fixed and mobile), data and fax traffic worldwide. SIRIUS Telecom's customers include PTTs, international wireless providers, and several of the largest US, Asian, South American and European telecom carriers. SIRIUS Telecom utilizes Nortel DMS 250/300 switching facilities in conjunction with multiple, leading-edge gateway platforms to create a seamless global network solution that is flexible, cost-effective and dependable. For more information, call (805) 690-2800 or visit www.sirius telecom.com.
